AB LEGEND BLOCK

For Walls Up To 36" Tall*

A simple garden wall system for walls up to 3' tall. AB Legend block are hollow units that are easy to lift and install. The hollow cell is to be filled with gravel creating more mass and resistance to retain on site soil. A bottom notch and top lip lock together to create proper alignment and set back for your wall. A solid cap can be installed on the top course. Secure the wall cap with a concrete adhesive.

4"	8	16	24	32	40
8"	16	32	48	64	80
12"	24	48	72	96	120
16"	32	64	96	128	160
20"	40	80	120	160	200
24"	48	96	144	192	240

288 units per pallet

Handy Stone II can be used to make straight and curved walls.

TO INSTALL

1. Prepare a base trench approximately 12" wide x 4" deep.
 2. Compact native soils, and spread 1" of concrete sand.
 3. Lay first course of Handy Stones checking for level as you go.
 4. Position the second course so the bottom lips overhand the lower course and the blocks are staggered with those of the lower courses.
 5. Back fill behind the wall as it is built up.
- Secure top course with a Concrete Adhesive if needed.
Handy Stone walls not to be installed over 24" tall.

NURSERY STONE

20"	50	75	100	125	150
24"	60	90	120	150	180

128 units per pallet

In addition to straight walls, Nursery Stone can easily make curved walls. Install in a radius at corners.

TO INSTALL

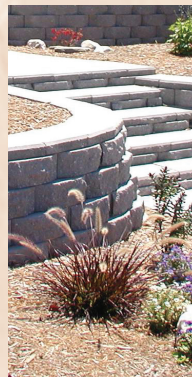

1. Dig a trench 4" deep and 12" wide.
 2. Add 2" of gravel in trench and compact.
 3. Install first course, checking for level side to side and front to back.
 4. Add additional course in a running bond pattern and locking lower lip to course below.
 5. Fill behind wall with gravel or native soils as you build up the wall.
- Nursery Stone not be installed over 24" tall.
Secure top course with a concrete adhesive if needed.

AB LEGEND BLOCK

Estimating Chart for AB Legend Block

Wall height/length	5'	10'	15'	20'	25'	30'
6"	4	8	12	15	19	23

36"	23	40	68	90	113	135

72 units per pallet

AB Legends can be installed with inside or outside radius, as well as straight walls. Alignment wings on side can be broken off to install curved walls.

TO INSTALL

1. Dig a trench 12" wide and 6" deep.
2. Add 3-4" of crushed rock, leveled and compacted.
3. Install first course, leveling side to side and front to back as you go.
4. Fill the blocks and 4" behind wall with crushed gravel.
5. Add additional soil behind gravel is needed.
6. Install additional course with a minimum of a 3" offset.
7. Finish by installing an AB legend wall cap. Ledged caps are 15-5/8" long. Legend Block not intended to be installed over 3' tall.
