

TJP

Thin Joint Permeable Pavers

manufactured by

Air Vol Block can now manufacture a Thin Joint Permeable paver. The Thin Joint Permeable has a 4.5 mm (3/16") joint opening. This joint opening will allow 200 to 300" infiltration per hour through the joints with a No. 9 aggregate in the joints. The Thin Joint Permeable is installed the same way as our conventional 7.5mm joint permeable paver would be installed.

The TJP pavers are available in three surface textures- Euro Cobble, Pillow Top Roman and Classic Bevel Edge Roman.

TJP Pavers available in the following sizes; 5 1/2" x 5 1/2" • 5 1/2" x 8 1/4" • 5 1/2" x 11" 11" x 11" sizes are nominal.

TJP are sold separately to allow for flexible design solutions.

Choose from a variety of patterns for installations, or just one size.

TJP can be ordered in any of the 14 colors that Air Vol Block can manufacture.

TJP paver use a different type of spacer than what is typically used to create the joint space between pavers. TJP could be installed as a non-permeable pavers in that the joint width is 4.5mm and will accept most stabilized joint sands.
