

TURFPAVERS

Turf pavers are manufactured with 5,000 psi concrete and comply with ASTM C1319, Standard Specifications for Concrete Pavements. Ideally grass would be seeded in the voids to create a green way that would have the structural performance of concrete. Turf pavers are intended to support the occasional vehicle that would travel upon them. Applications for Turfpacers would be emergency access roads, overflow parking areas and auxiliary driveways. Turfpavers are not intended for daily vehicle use and will most likely crack. This is normal and does not affect their performance. Turf pavers are only stocked in Grey, but can be ordered in custom colors. Set up charges may apply. For proper installation, see ICPI TechSpec 8.

Special order color Cerro Blend

ACCESSORIES & MORE

Air Vol Block stocks a complete line of accessories for paver installation-

- EZ Edge Restraint, Flexible or Rigid
- Class II Road Base
- Air Vol Polymeric Stabilized Joint Sand in Grey and Beige Colors
